

SMART DOCUMENT SCAN SOFTWARE 2.7

Save time, boost productivity, add value

Get the most out of your HP document scanner. HP Smart Document Scan Software, included with your scanner, can help you elevate your business to a higher level of efficiency. This fast, ISIS[®]-based capture and routing application lets you easily customize options to **ENHANCE, MANIPULATE, SEND, STORE,** and **PRINT** your scanned documents. HP Smart Document Scan Software makes complex tasks simple, so you can accomplish more, faster.

Let the scanner work for you

HP Smart Document Scan Software lets you create dozens of scan profiles with a variety of options such as paper size, resolution, file format, destination, and more. You can then assign these profiles to customizable buttons on your scanner for instant execution of your pre-determined functions. Scans become completely automated so you can carry out complex jobs with the touch of a button.

Select a format to suit your needs

HP Smart Document Scan Software supports a wide range of file formats to make things easier for you. When you save files as Microsoft[®] Office Word or Excel[®], searchable PDF, HTML, or other text files, optical character recognition (OCR) automatically activates to produce fully editable and searchable text.

Save scans as PDF, TIFF, or JPEG to easily email or organize files. Or choose additional PDF formats—PDF/A, a “timeless” format, or PDF-MRC, a highly compressed format—to archive scans.

Send scanned documents to remote locations right from the scanner

HP Smart Document Scan Software makes it easy to save scanned documents to a shared drive, a Microsoft SharePoint[®] portal server, or send to remote locations via file transfer protocol (FTP) or email. A number of third-party applications are integrated out of the box, and HP Smart Document Scan Software can send scans directly to any application that supports command-line parameters.

Get a quality scan

Kofax[®] VirtualReScan[®] (VRS) works in conjunction with HP Smart Document Scan Software to help you get clear, readable results regardless of the condition of your original document. It automatically adjusts color and contrast of your scans to produce smaller files, greater detail, and improved OCR.

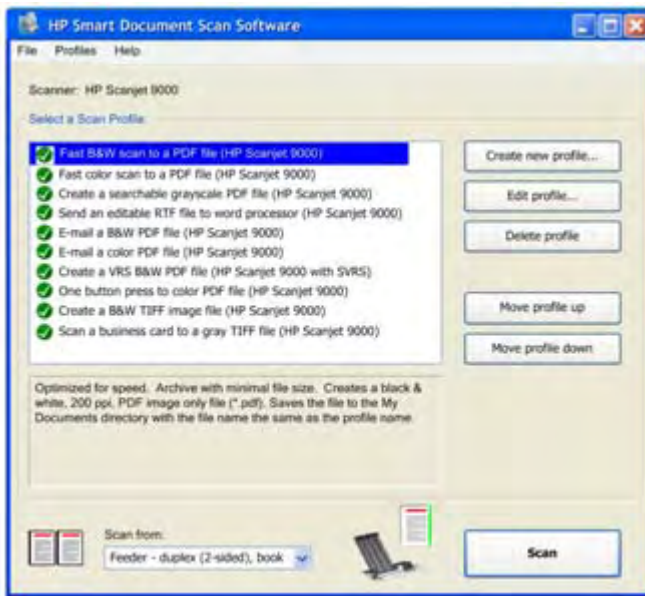

Quickly turn piles of paper into organized digital files

Just drop a stack of sheets into the automatic document feeder, press a button to begin scanning, and attend to other work. Use bar codes, blank pages, or specialized separator sheets to divide batches into separate documents. Or using the software, manually separate or combine documents after the pages are scanned.

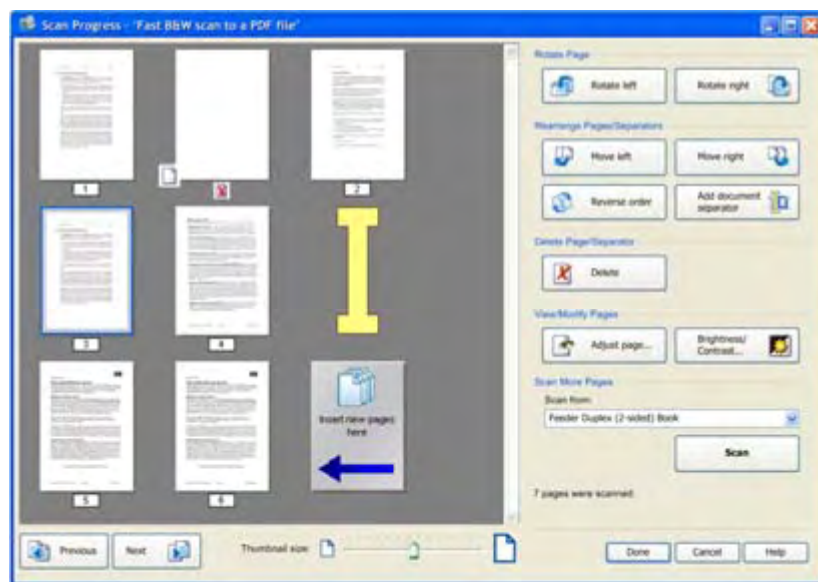

Easily get the results you need with the right tools for the job

HP Smart Document Scan Software lets you select settings for auto-crop, auto-straighten, auto-orient, page resize, and deletion of blank pages. And, scanned pages can be reordered, deleted or inserted, and rotated using the preview window. The array of options and tools helps you get just the result you're looking for.

HP Smart Document Scan Software makes complex scanning jobs simple. Just select a profile, press the scan button, and walk away. HP Smart Document Scan Software does the rest. Need more flexibility? Create a profile that does exactly what you need for quality results every time.

Main screen—Create a custom profile to get the exact scan you want with one-click simplicity. Arrange your profile list so the most frequently used tasks are first.

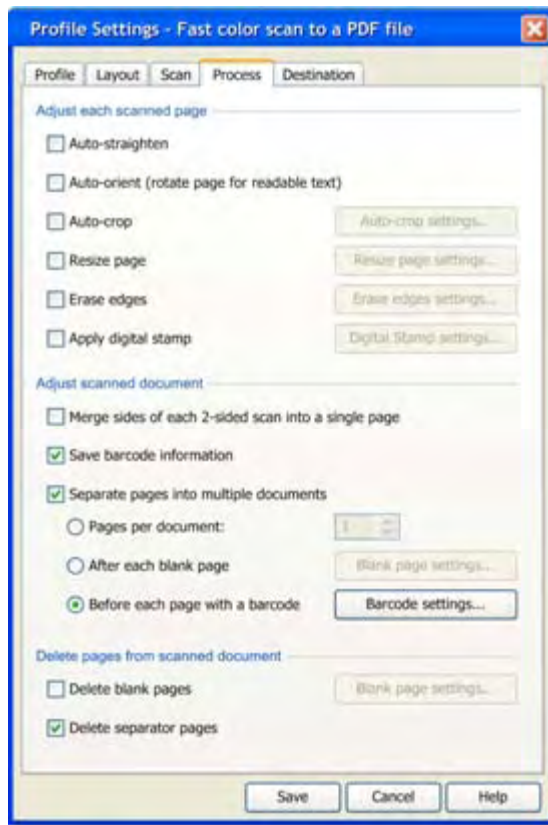

Scan Progress window—Monitor scanning progress, view your scans, and make adjustments to get the results you want. If desired, add additional scanned pages and remove any that are unneeded.

Layout tab—Specify the size of your document and how pages will be fed.

Scan tab—Select the resolution, adjust color settings, and enable Kofax VRS for superior scan clarity.

Process tab—Take advantage of automatic tools to remove blank pages, correct page orientation or page alignment, and more.

Destination tab—Save your scan as a common file format. Even choose to send it to another application for archival, sorting, or to begin a business workflow.

HP SMART DOCUMENT SCAN SOFTWARE 2.7

Specifications

Productivity features

Save settings as profile:

- Scan settings and post-scan processing options can be saved beforehand as a job profile, so that you can quickly scan using your favorite settings

User interface languages:

- English, French, Italian, German, Spanish, traditional and simplified Chinese, Korean, and Portuguese Brazilian

Map and invoke HP Smart Document Scan Software profiles (workflows) from a scanner button on HP scanners.¹

Profiles can be configured for silent scanning with no user interaction required.

Scan settings¹

Paper source—specify flatbed or feeder

Paper size:

- Letter
- Legal
- Executive
- Tabloid
- US Check
- A3
- A4
- A5
- B5
- Business card
- Maximum
- Custom

Specify a scan area of the page(s)

Simplex/duplex

Resolution

Color mode:

- Black and white
- Gray (8-bit)
- Color (24-bit)

Dither

Adjust contrast

Adjust midtone

Adjust threshold

Process settings

Auto-straighten

Text orientation recognition and auto-orient

Resize page

Auto-crop

Erase edges

Detect bar codes:

- Code 39, Code 39 full ASCII
- EAN 8/13, UPC-A, UPC-E (6-digit)
- Code 128, GS1-128 (UCC/EAN-128)
- Codabar
- ITF (2 of 5 interleaved)
- Postnet code

Delete document separator pages

Save decoded bar code to XML file

Digital stamp

Page merge for duplex scans

Separate large scan jobs into separate documents:

- By number of pages
- By bar code
- With blank pages (auto-detection)
- With an HP Separator Page

Automatically delete blank pages

Adjust blank page recognition settings:

- By percentage of blank area
- By removing page edges (adjustable margins)

Routing destinations

User-defined command-line application

Email (SMTP or via locally configured email client)

FTP

Printer

SharePoint 2003 and 2007
